Citizens for Liberty (CFL)

Citizens for Liberty, at its core, believes in a government of the people, by the people, and for the people. We strive to fight for and protect the rights of citizens and states from government overreach. We believe in an America-first mindset when approaching foreign policy and international aid. Our goal is to create a society that allows for the American dream to flourish by removing the government regulations that are preventing individual citizens and businesses from achieving success. We strongly believe in state sovereignty and a small, central government. Furthermore, we believe in enabling families by allowing school choice. We fully believe in protecting American citizens and their right to life, liberty, and the pursuit of happiness as established in the Constitution.

Center for a Brighter Future (CBF)

At the Center for a Brighter Future, we believe in securing a diverse and flourishing culture for generations to come. With this generational mindset, we believe America should pursue both foreign and national policies that will provide for future growth instead of short term results. We believe in a diverse society that welcomes people from all nations to immigrate to America. We believe in taking necessary steps to protect the safety of our citizens by implementing common sense gun reform. We also advocate for allocating government funding to support social programs that will help struggling families recover and thrive in America.

Foundation for Conservatism (FFC)

The Foundation for Conservatism fights for the equality and well-being of all American citizens. We believe this is best accomplished when we promote laws that give every American a fair and equal chance. We believe in a balance in state sovereignty and federal oversight. We fully support immigration and believe in providing opportunities for those seeking to live in America. We strive for a democratic approach to politics and seek to return the power to the people. As such, we support the abolition of the electoral college and are constantly searching for other methods to empower the citizens in this great nation.
